

AndonWIRELESS

Your benefits

The WERMA AndonWIRELESS call for action system is the quick and easy way to report, display and rectify problems in a targeted manner. Have you been mainly been solving faults and problems by shouting over to colleagues or walking around to find or provide support? Using AndonWIRELESS, you can now report them professionally at the push of a button. The wireless connection between the buttons and signal towers makes installation easier and faster than ever before, saving you time and money. Every button (Andon WirelessBOX) can be operated using mains power or battery power. This allows you to use it as a stand-alone system for mobile applications, e.g. on forklifts or supply chain vehicles. Make sure your operation is ready for future requirements and flexible for greater efficiency in the workplace.

- Andon WirelessSET with 5-button box (Andon WirelessBOX) and 3-tier signal tower
- Andon WirelessSET with 2-button box (Andon WirelessBOX) and 2-tier signal tower

Configure your individual call for action system easily and conveniently using the Quickfinder.

Typical applications

- Professional reporting of workstation problems
- Material replenishment control with acknowledgement function
- Optimisation of processes in production and logistics departments
- Access control for doors and gates

Initial startup

- Configure the button box (Andon WirelessBOX) and receiver (transceiver)
- Power up the button box (Andon WirelessBOX) via the mains plug or battery
- Integrate the receiver (transceiver) into a signal tower without needing any tools

Features

- Andon WirelessBOX with 2 or 5 buttons
- Signal tower with 2 to 5 tiers
- Configurable button illumination
- Multifunctional acknowledgement function
- Transceiver for wireless signal reception
- Simple configuration software
- Can be combined with control station function: easy to upgrade to SmartMONITOR or AndonSPEED
