

## Create transparency

In addition to classic signal devices, WERMA offers intelligent solutions that make Industry 4.0 easy to grasp and immediately implementable in practice. Our solutions are ready-made, can be used immediately and function "out-of-the-box". Because WERMA takes signal technology a step further!

With our call for action and signal systems (*AndonLIGHT*, *KombiSIGN Reflect*, *SignalSET* and *AndonWIRELESS*) you can quickly and easily report problems at manual workstations and control access to doors and gates without the need for monitoring software.

Thanks to our clever solutions (*AndonSPEED*, *SmartMONITOR* and *WeASSIST*) with monitoring software, you can detect weak points immediately. To uncover hidden potential in manufacturing and logistics processes you need a system to measure unproductive times - whether at manual workplaces, dispatch stations or in automated manufacturing.
